

Heavy Duty Pressure Relief

Designed for Inert Gas and CO²
Fire Suppression Venting

Our Custom Pressure Relief Dampers Ship Calibrated for Fire Suppression System Venting Applications

*Counterbalance weights
mounted to damper blades*

The BD-200-HD-FS Pressure Relief Damper

Our fire resistant, [pressure relief damper](#) is designed for inert gas and CO² fire suppression system venting and similar low back pressure applications that require specific opening pressures.

Built with the same heavy duty construction as the [BD-200-HD](#) pressure relief damper, the [BD-200-HD-FS](#) is configured at the factory to open at designated pressures required during fire suppression system gas release.
