

## Our New Worm Gear **Overcomes Supply Chain Challenges!**

INTRODUCING THE RT-WGA-P WORM GEAR DAMPER DRIVE

**Manufactured with an improved, injection-molded plastic gear set that replaces the typical aluminum gear set.**

This innovative and proven solution was developed long before supply chain issues were a reality. It's in stock and ready to ship.

**Features include:**

- Plastic gear set that slides over existing damper shaft, eliminating set screws
- Injection-molded plastic helical gear that creates a tighter gear set
- Quick and easy installation
- Years of proven performance with our Solo-Control and 75F dampers lines
- Complies with UL 2043

**Designed For:**

- All take-off balancing applications
- Dampers with 1/4" or 3/8" square shafts
